

# Mini-Mouth and Toothbrush

## Materials Needed:

Scissors, Clear Tape, Glue, Cardboard

## To Assemble Toothbrush:

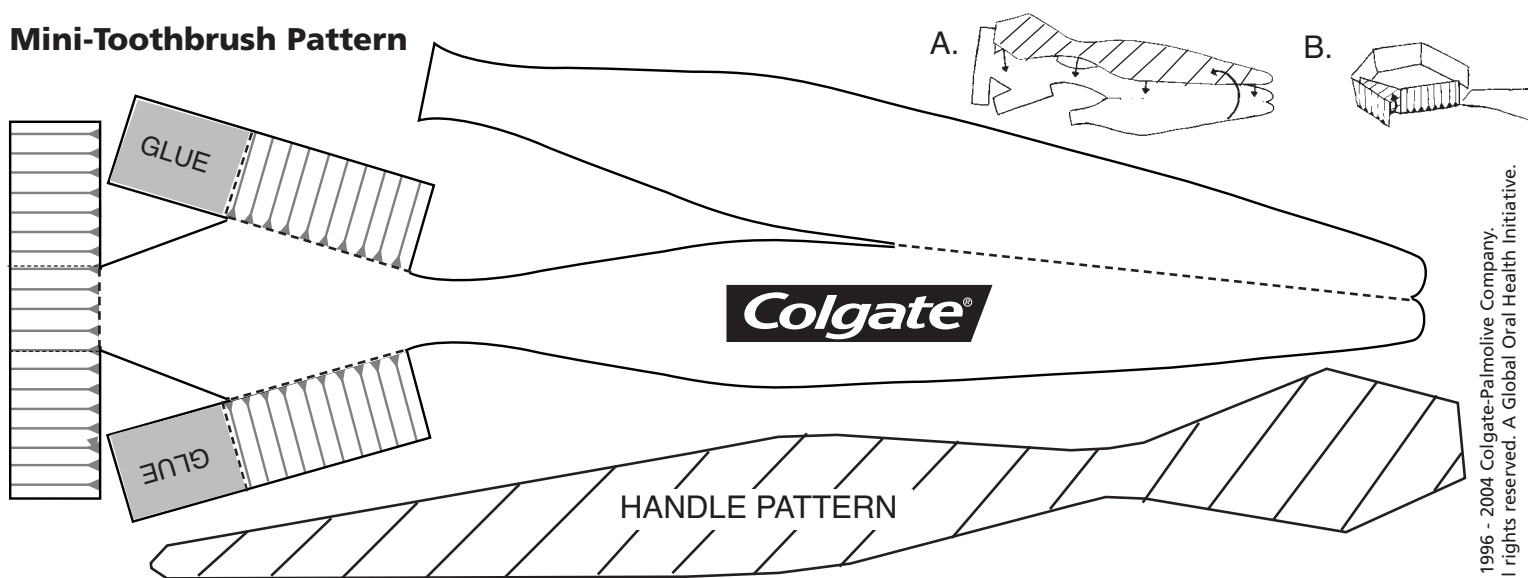

1. Cut out toothbrush and handle pattern along solid lines.
2. Prepare a reinforcement for the handle of the toothbrush by tracing the handle pattern on a piece of cardboard and cutting it out.
3. Place toothbrush printed side down. Fold flaps up along all dotted lines.
4. Sandwich the cardboard handle between the two paper handle sections and glue in place (See Illustration A).
5. Glue the top bristle sections to the shaded side section (See Illustration B).

## To Assemble Mouth:

1. Cut out mouth along solid lines.
2. Lay mouth printed side down and fold up all sections along dotted lines ----- Except the back fold marked •••••. (See Illustration A).
3. Reverse fold ••••• folding printed surface to printed surface.
4. To form the back teeth on the top and bottom sections, glue the shaded flap to the base forming a box (See Illustration B).
5. Insert the tabs on the front teeth into the box on both the top and bottom sections. Tape in place (See Illustration C).
6. On top and bottom, wrap tape around the back teeth and back panel of the model (See Illustration D).
