

Letter of Engagement

Date

Dear Principal _____:

We appreciate the opportunity to present the “*Lessons In A Lunch Box: Healthy Teeth Essentials & Facts about Snacks®*” program to your students. The oral health education program using a lunch box was developed to encourage dental health education in the classroom. The lunch box will help to educate school-age children and will continuously reinforce the invaluable oral health lessons found everywhere on the container. The lesson guides provided for the teachers will help to further advance the knowledge students will gain about the importance of proper dental care and healthy diets.

Please review the enclosed description of the oral health initiative. You can also visit www.mycohi.org to learn more about the *Lessons In A Lunch Box* initiative.

It is most gratifying to witness the elation displayed by school children receiving the cleverly crafted lunch box designed with oral health messages, healthy diet recommendations, and a list of dental schools complete with all the essential dental hygiene products. *A Five Day Lesson Guide for Teachers* can be downloaded from The Maryland Children’s Oral Health Institute website to support your use of the lunch box as an educational aid at in the classroom and at home.

If you would like your school to participate in the program this fall, please complete the elementary school section of the enclosed registration form today. You will be contacted with the specifics, including the date the lunch boxes will arrive at your school.

Thank you for considering the *Lessons In A Lunch Box: Healthy Teeth Essentials & Facts & About Snacks®* program. Your commitment will help to improve oral health education elementary school students.

Best regards,
